## **Track: Collaboration Systems and Technologies**

### **Minitrack: Collaboration in Virtual Worlds and Metaverses**

The “Collaboration in Virtual Worlds and Metaverses” minitrack focuses on:

1. The design, application, and evaluation of virtual world environments and applications.
2. The impact of virtual world characteristics on individual and team behavior.
3. Collaboration methods, techniques, patterns, and best practices to support productive (a) synchronous collaboration between individuals and groups.
4. Theoretical foundations and practical approaches to understand, model, and design collaboration in virtual worlds and metaverses.
