

January 4-7, 2011, The Grand Hyatt Kauai Resort & Spa, Koloa, Kauai, Hawaii.

**Track: Organizational Systems and Technology**

**Minitrack: IT Personnel: The IT Artifact the Field Cannot Do Without**

This minitrack covers all issues relating to the IT artifact of the IT worker. Submissions should be focused at the individual level, department or workgroup level, or industry level. This minitrack seeks groundbreaking research in what is a substantially under-researched area. Studies creating theory on how environmental factors impact IT personnel, such as mergers and acquisitions, new technologies, and new organizational forms are examples of the type of papers sought. Perspectives on the IT worker are welcomed from all methodological viewpoints. This minitrack will be a home for HICSS papers that focus on IT personnel and as such submitted papers should ensure that the IT worker is the focus of the study.

**Minitrack Co-chairs**

**Kay M. Nelson (primary contact)**
